| SI No | Title   | Author                | Edition     | Copies |
|-------|---|-----------------------|-------------|--------|
|       |   |                       |             |        |
| 1     | Schaum's outline of theory and problems of statistics / | Spiegel, Murray R.    | 3rd ed.     | 12     |
| 2     | Mathematical physics /                                  | Rajput, B.S.          | 16th ed.    | 4      |
|       |   |                       |             |        |
| 3     | Discrete mathematics                                    | Johnsonbaugh, Richard | 5th ed.     | 3      |
|       | Genetic algorithms in search, optimization, and machine |                       |             |        |
| 4     | learning /  | Goldberg, David E.    |             | 6      |
| 5     | Fundamentals of abstract algebra /                      | Malik, D. S.          |             | 4      |
|       | Algorithm design : foundations, analysis, and Internet  |                       |             |        |
| 6     | examples /  | Goodrich, Michael T.  |             | 10     |
| 7     | Algorithmics : the spirit of computing /                | Harel, David          | 2nd ed.     | 3      |
| 8     | A textbook of optics /                                  | Subrahmanyam, N.      |             | 10     |
| 9     | Pragati s practical physics : with viva-voce /          | Gupta, S.L.           | 25th ed.    | 6      |
|       | A first course in differential equations with modeling  |                       |             |        |
| 10    | applications /  | Zill, Dennis G.,      | 7th ed.     | 5      |
| 11    | Differential equations /                                | Ross, Shepley L.      | 3rd ed.     | 6      |
|       |   | Wylie, Clarence       |             |        |
| 12    | Advanced engineering mathematics /                      | Raymond,              | 6th ed.     | 2      |
|       | Building and solving mathematical programming models    |                       |             |        |
| 13    | in engineering and science /                            |                       |             | 4      |
| 14    | Heat and thermodynamics /                               | Brijlal,              |             | 2      |
|       |   | Zemansky, Mark        |             |        |
| 15    | Heat and thermodynamics : an intermediate textbook /    | Waldo,                | 7th ed.     | 3      |
|       |   |                       |             |        |
|       | Theory and problems of vector analysis and an           |                       |             |        |
| 16    | introduction to tensor analysis : SI (metric) edition / | Spiegel, Murray R.    | Metric ed.  | 21     |
|       | Schaum's outline of theory and problems of differential |                       | SI (Metric) |        |
| 17    | equations in SI metric units /                          | Ayres, Frank.         | ed.         | 5      |
|       | Schaum's outline of theory and problems of set theory   |                       |             |        |
| 18    | and related topics /                                    | LIPSCHUTZ, Seymour    | 2nd ed.     | 6      |
|       |   |                       |             |        |
| 19    | Schaum's outline of theory and problems of matrices /   | AYRES, Frank          | Metric ed.  | 5      |
| 20    | Introduction to statistics and probability /            | ISLAM, M. Nurul       | 2nd ed.     | 29     |
| 21    | The history of mathematics : an introduction /          | Burton, David M.      | 4th ed.     | 2      |
| 22    | Probability and statistical inference /                 | Hogg, Robert V.       | 6th ed.     | 2      |
| 23    | Quantum mechanics /                                     |                       | 22nd ed.    | 2      |
|       | College mathematical methods : integral transforms      |                       |             |        |
| 24    | & boundary value problems /                             | Rahman, Abdur.        | 1st ed.     | 8      |
| 25    | Introduction to mathematical statistics /               | Hogg, Robert V.       | 5th ed.     | 1      |
| 26    | Topics in algebra /                                     | Herstein, I. N.       | 2d ed.      | 3      |
|       | Schaum's outline of theory and problems of laplace      |                       |             |        |
| 27    | transforms /  | Spiegel, Murray R.    |             | 4      |
| 28    | Linear algebra : with applications /                    | Nicholson, W. Keith.  | 4th ed.     | 1      |
|       | Schaum's outline of theory and problems of graph        |                       |             |        |
| 29    | theory /  | Balakrishnan, V. K.   |             | 6      |

| SI No | Title   | Author              | Edition     | Copies |
|-------|---|---------------------|-------------|--------|
| 30    | Introduction to mathematical statistics /                 | Hogg, Robert V.     | 7th ed.     | 1      |
| 31    | Elementary survey sampling /                              |                     | 7th ed.     | 1      |
|       |   |                     |             |        |
|       | Schaum's outline of theory and problems of advanced       |                     | SI (metric) |        |
| 32    | mathematics for engineers and scientists /                | Spiegel, Murray R.  | ed.         | 2      |
| 33    | Fundamentals of algorithmics /                            | Brassard, Gilles,   |             | 3      |
| 34    | A SAS/IML companion for linear models /                   | Perrett, Jamis J.   |             | 2      |
|       |   | Montgomery, Douglas |             |        |
| 35    | Applied statistics and probability for engineers /        | С.                  | 3rd ed.     | 5      |
| 36    | Applied statistics for engineers and scientists /         | Devore, Jay L.      | 2nd ed.     | 4      |
|       | Probability and statistics with reliability, queuing, and | Trivedi, Kishor     |             |        |
| 37    | computer science applications /                           | Shridharbhai.       |             | 17     |
| 38    | Introduction to electrodynamics /                         | Griffiths, David J. | 3rd ed.     | 5      |
| 39    | Bayesian theory and methods with applications /           | Savchuk, V. P.      |             | 3      |
|       | Probability and statistics for engineering and the        |                     |             |        |
| 40    | sciences /  | Devore, Jay L.      | 6th ed.     | 12     |
| 41    | Tensor calculus /   | Spain, Barry.       | 3rd ed.     | 2      |
| 42    | Introduction to special relativity /                      | Resnick, Robert,    |             | 2      |
| 43    | LASERS : theory and applications /                        | THYAGARAJAN, K.     |             | 1      |
| 44    | Field and wave electromagnetics /                         | Cheng, David K.     | 2nd ed.     | 6      |
| 45    | Bangladesh export statistics /                            |                     |             | 3      |
|       | Quantum physics of atoms, molecules, solids, nuclei,      |                     |             |        |
| 46    | and particles /   | Eisberg, Robert.    | 2nd ed.     | 3      |
| 47    | Elementary linear algebra /                               | Anton, Howard.      | 8th ed.     | 4      |
| 48    | Calculus /  | Stewart, James,     | 8th ed.     | 1      |
| 49    | An introduction to generalized linear models /            | Dobson, Annette J., | 4th ed.     | 1      |
|       |   |                     | Total       | 253    |
